WORK EXPERIENCE

Software Development Engineer II Sixt R&D India

02/2021 - Present

Bengaluru

Achievements/Tasks

- Leading three frontend React projects from scratch. I am responsible for setup, design and implementation. These projects handle over around 4 lakh transactions a month.
- Have optimised few projects and reduced the loading time by 30%.
- Have used React Query extensively for server side state management. Have used Jotai and Contexts for client side state management. I have working knowledge of Redux and Recoil.
- Have also used Instana, Google Analytics for application event tracking in production.
- Have worked extensively with MUI, Tailwind and SASS libraries.
- Worked extensively with Google Map libraries. Have also implemented complex drag and drop operations between tables and Google Map. I have also used Firebase for implementing push messages.
- Developed a component library with React and Storybook for use in different projects through out the organization.

Application Engineer (Frontend) Oracle India Pvt Ltd.

03/2019 - 02/2021

Bengaluru

Achievements/Tasks

- Developed a client application from scratch with React & GraphQL to demo and validate the Aconex GraphQL API. Implemented OAuth 2.0 single sign-on and dockerized the application.
- Developed a GraphQL Schema parser using NodeJS for consumption by Apiary document generator. Had reduced the manual effort by 10X.
- Managed the process to add new clients & redirect uris to the SSO server.

Senior Systems Engineer (Frontend) Mercedes Benz for Infosys Ltd.

05/2015 - 03/2019

Achievements/Tasks

- Have worked on multiple projects using Angular 5 and Bootstrap.
- Have implemented Single sign on and internationalization for few of these applications.
- Have also worked on PrimeNG, AG Grid, Angular JS 1.5x.
